

Mad Science can come to you for a STEM related in-school field trip!

Mad Science Workshops Correlate to the

Science and Engineering Practices

Students will experience hands-on interactions as they question how things work, then conduct experiments and examine evidence to reach their own conclusions. They can then explore how these principles translate to their every-day lives.

Ask about our grade specific information!

Disciplinary Core Ideas

Students will explore scientific principles with age-appropriate activities and vocabulary to help build their scientific literacy while they're having fun!

Cross-Cutting Concepts

All Mad Science workshops show students how to make and test hypotheses in different topics to help them continue to explore the world around them.

All Mad Science programs include fun, entertaining and exciting activities that instill a clear understanding of what science is really about and how it affects the world around us! Each class also includes a take-home activity related to the topic, because science doesn't stop at the classroom door!
